

Internet Browsers Options Available

The HelpAccountants.com web site can be browsed by using any of the following browsers.

Microsoft's Internet Explorer is the most common browser in use. Unfortunately this makes the browser the target for hackers, allowing them access to sensitive data on your computer hard disk! Many companies recommend that their employees use one of the alternative browsers, and details and links to the most popular ones are given below.

Click on the icons below to download the most up-to-date version of the browsers. The version numbers listed below is simply the last version that was verified with the Help Accountants web site when this document was written.

Firefox

HelpAccountants.com recommend that you use V3.6 or higher.

Google Chrome

HelpAccountants.com recommend that you use V8.0 or higher.

Opera

HelpAccountants.com recommend that you use V11.0 or higher.

Apple Safari

HelpAccountants.com recommend that you use V5.0 or higher.

Netscape

The Netscape browser should work with the HelpAccountants web site, but please note that this browser is no longer supported by the company that created it, and hence it no longer receives security patch updates.

Microsoft Internet Explorer

HelpAccountants.com recommend that you use V8.0 or higher.
